

## **H1N1 vaccine distribution at WFMG offices**

Wheaton Franciscan Medical Group has begun receiving H1N1 vaccine at some offices. Please call your physician office to find out about availability. Please note that our offices are following the CDC and state priority list for distribution of H1N1 vaccine. Initially, only the following patients will be eligible for H1N1 vaccination.

- Pregnant women
- Persons who live with or provide care for infants age 6 months or younger (examples: parents, siblings, daycare providers)
- Health care and emergency medical services personnel who have direct contact with patients or infectious material—this is more restrictive than previous recommendation.
- Children age 6 months - 4 years
- Children and adolescents age 5-18 years who have chronic medical conditions that put them at higher risk for influenza-related complications
